Category 1: Addition

Before

After

- An open concept for their new addition focuses on a large country style kitchen and grand entrance. As well as incorporating a beautiful exterior door, a new bathroom was added to meet the owner's needs.
- One of the major challenges in the foundation work was the high water which was solved with proper drainage and pump system to keep the crawl space dry.
- The 16' tall vaulted ceilings required special beams to properly support the wide span.
- During the demolition process we found old log timber construction hidden behind the old walls. The owners wanted to preserve a bit of this and feature it. It was decided that incorporating it along the kitchen peninsula seating area would showcase this detail perfectly.

VALUE OF PROJECT:
\$150,000.00
