Category 3: Bathroom

- Upon inspection, one of the challenges we encountered was to design a new bathroom, while giving it the appearance that it always belonged. We discovered the plumbing was in need of replacement and the flooring was not level.
- The solution was to replace with new plumbing. Re-leveling the floor without doing damage to the ceiling beneath proved to be a challenge.
- We decided to rebuild the new floor supports adjacent to the existing.
- We installed new octagon white tile floor and base to give it the same appearance as the old floor.
- The new claw foot tub with the spectacular plumbing fixtures finished off this bathroom to give the look and new function the owner expected.
