RENOVATION AWARDS

ALL CANADIAN RENOVATIONS

Category 2: Kitchen

- The challenges of designing their new kitchen and dining area were met by creating more open space.
- The walls were stripped bare and other walls moved to allow us to upgrade the knob and tube wiring and replace the old plumbing.
- We upgraded the windows to new energy efficient units and insulated the exterior walls with eco-friendly insulation.
- The design of the cabinets suited precisely what this family expected with all the modern amenities but kept the look of antique cabinetry.
- In addition, we used hand scraped hardwood floors to compliment the look and feel of an older home.

VALUE OF PROJECT:
\$60,000.00
