RENOVATION AWARDS

ALL CANADIAN RENOVATIONS

Category 2: Kitchen

- Preservation of the already outstanding view needed to be maintained yet upgrades needed to be done to the poorly insulated walls.
- In addition, the owner already owned a very large deep fridge which took away a lot of the view of the kitchen and hid the counter as well. Our solution was to recess the fridge 2" into the wall while preserving the finish detail on the opposite side
- New eco-friendly insulation was used to provide r-values to meet codes.
- Seating was provided at the main counters overlooking the view of the river to cap off the now modern kitchen.
- The beautiful dark stained cabinets with quartz countertops were complimented with slate floor tiling over in-floor heating.
