RENOVATION AWARDS

HARWOOD DESIGN BUILDERS

Category 2: Kitchen

- The kitchen was completely gutted, expanded by 120 square feet and redesigned.
- The alcove was built and secured with angled steel brackets bolted onto the outside of the home, providing for the strength required and a clean interior and exterior finish.
- Hydro was relocated to the adjacent garage and brought into the residence via an underground conduit.
- All renovations were strategically planned to ensure minimal disruption to the client as possible.
- Detailed concrete and stone counter tops, clean line natural wood cabinets and seamless integration into the also renovated family living space created a new spacious social nexus in this home.

VALUE OF PROJECT:
\$150,000.00
