

Renomark

RENOVATION AWARDS

INNER CITY RENOVATIONS

Category 1: Addition

- The completed project created a wonderful open living space while adding only 350 square feet.
- Sensitive design preserved privacy and views in the expansion. Large new windows added natural light, and their placement enhanced privacy.
- To promote efficiency, all lighting is CFL or on dimmer switches.
- Interior and exterior materials were selected for their environmental properties.
- Energy efficient appliances include a convection wall oven and an induction cooktop.
- The follow-up eco-Energy audit gave a rare rating -- there were zero recommendations for improving the energy efficiency of the home!
