RENOVATION AWARDS

SAKIYAMA CONSTRUCTION

Category 6: Whole House

- The new full glass front door was shifted to center with two matching sidelights. Frosted film on the glass added to the contemporary look.
- The typical rear door/basement landing was reconfigured with the design of the main floor family room.
- Removing the walls separating the doorway from the kitchen served to open up floor space for the kitchen and bring in added light to kitchen and stairwell.
- The entire back wall of the kitchen now opens up to the family room addition with cathedral ceiling creating a bright airy space.
- The majority of the flooring was replaced with prefinished solid oak including the dining room living room and hallways.
- The existing bathroom also received a new glass block window to improve the light level in the bathing area.

VALUE OF PROJECT:
\$149,800.00
