TRIKOR BUILDERS

Category 3: Bathroom

- The bathroom needed to be enlarged and redesigned to increase function.
- The toilet was moved from one side of the room to the other to accommodate a longer vanity.
- The bathtub stayed in the same place, but the plumbing was switched to the other side so noise from flowing water wouldn't be heard through the bedroom wall.
- The new bathroom door, with its reeded glass inset, allows a lot of natural light inside for a more spacious effect.

VALUE OF PROJECT:
\$15,000.00
